to 40 words.

Co-op to Sell Recycled Materials. Joseph. 281-5119. Portland.

Anyone wishing help building a Methane digester, windmill, or solar heating unit for home, call Peter, 287-7215. Portland.

Need people doing crafts, painting, carpentry, schools, etc. to share warehouse space in Community Coffeehouse in SE Portland. 236-2830.

Cheap computer time available; especially interested in use by non-profit groups. Utilities not provided. For information contact Rusty Whitney, OMSI. 224-9500.

Introduction to RAIN

RAIN is a monthly bulletin board. As stuff comes our way by phone, mail, feet, hands and mouth we make entries, abstracts, paragraphs. We emphasize environmental/energy related and communications kinds of information; and we are interested in the evolutionary possibilities of inter-disciplinary connections.

Our geographic emphasis is the Pacific Northwest, though our prejudice will be Oregon, and more specifically Portland. You can correct our bias by your feedback, sending us information on projects, exciting books, pieces, newsletters, ideas, photos, corrections. (see also reader inquiry card).

Positions and Situations (see this page) is a place for you locate others, more or less without our editorial intervention. If you are thinking about thinking about doing something here's the place to find next steps and connections.

We have spent nearly as much time constructing our mailing list, as compiling the newsletter. It is presently composed of environmental educators, people doing energy related research, other newsletters, other centers, community organizers, governmental and private environmentally related groups and agencies.

If you have other persons you think should receive RAIN drop us a note.

Why you may not be entered: We don't know about you, you are lost in brown boxes and manila envelopes, or we ran out of time and space.

You will notice initials following some entries: the person submitting the entry is found in the list of contributors.

In addition to RAIN, during the year we expect to publish: 1) City Survival, a short directory (or series) to information resources in Portland, 2) A Directory of Environmental Information Resources in the Pacific Northwest, 3) How To Sheets, guides to getting things done, like how to find your way through governmental bureaucracies, 4) An Access Guide, to materials at EEC/Energy Center.

Please mention RAIN when asking for information from individuals and groups; as it then encourages those people to keep us posted. (S. J.)

94965. \$6/yr.

From some of the people who did the Whole Earth Catalog. Emphasis more on energy, food, survival, political action. An exhaustive article on Agriculture by Anne and Paul Ehrlich.

TABLE IV	
Protein Equivalent of Combinations to Steak	
Combination in best proportions	Steak protein equivalent
2 cups rice + ¾ cups peas or beans	= 9.5 oz.
2½ cups rice + ½ cup soybeans	= 9.25 oz.
1½ cups rice + 2 cups skim milk	= 7.75 oz.
1½ cups rice + 2½ oz. cheese	= 7.75 oz.
4 slices whole wheat bread + 1 oz. cheese	= 2.5 oz.
1 cup whole wheat flour + 2 tbs nonfat dry milk	= 3 oz.
1½ cups whole wheat flour + ¼ cup beans	= 4.6 oz.
1 cup whole wheat flour + ½ cup soy flour	= 4.1 oz.
6-7 cornmeal tortillas + ¼ cup beans	= 2.6 oz.
½ cup nonfat dry milk + 1 cup beans	= 8.33 oz.
1/3 cup peanut butter ½ cup skim milk + 6 slices whole wheat bread	= 10.1 oz.

RURAL RESOURCES AND INFORMATION

PO Box 874
Toppenish, WN 98948

Establishing information exchange among persons living in country, forests and small towns.

**NORTHWEST CONFERENCE FOR
ALTERNATIVE AGRICULTURE.**
Nov. 21-23, 1974.

Being engineered by Becky and Woody Deryckx, and friends. Poplar Hills. Rt. 1, Box 64. Palouse, Wn. 99161. (509) 878-4503.

For people involved in Agriculture, both rural and urban. Land reform, alternative energy, marketing, economics.

**INTERNATIONAL INDEPENDENCE
INSTITUTE**

West Road Box 183

Ashby, Massachusetts 01431

Probably the central source of information about land trusts.

A very old network with roots in the thirties "acre and independence" movement, and Henry George (Progress and Poverty);

**Microfarms - A Proposal for
Development**

Glen A. Twombly. 1972. Old Route 202. Pomona, N. Y. 10970

A proposal and explanation of urban microfarms, similar in some ways to J. B. DeKorne's "Ecosystem".

The problems of human survival can only be solved by changes in the values, life style and environmental consciousness on the part of large sections of the population. Since the middle class urban/suburban portion of the society is most instrumental in setting and maintaining value systems and policies in this country this plan is directed primarily toward them.

**Energy Use for Food in the United
States**

Eric Hurst. Oak Ridge Nt. Lab.

ORNL - NSF - EP - 57

Oct. 73. 32 PP

The loaf of bread you bought today costs as much in energy as you would consume if you were to drive your car 40 or 50 miles.

Water Recycling

by Rafael Montanaro, Laboratory for Maximum Potential Systems, School of Architecture, Univ. of Texas, Austin, TX 78712 \$5.00

Residential water use options incl. low water, grey water toilets, reducing use with spray showers, foot pedal-actuated faucets, etc. (1j)

**An Algal Regenerative System For
Single-Family Farms and Villages**

C. G. Colueke & W. J. Oswald

Research on the utilization of algae for the reclamation of nutrients and water from agricultural waste waters, and on the development of photo-synthetic life-support systems.

Progress report available from Sanitary Engineering Research Laboratory

U. of California

Richmond Field Station

1301 S 46th St.

Richmond, Ca. 94804

\$2.00 (Check to: Regents of the University of California)

OREGON HERB SOCIETY
6825 SW Capitol Highway
Portland, Or. 97219

**FIRST ANNUAL NE WASHINGTON
HARVEST FESTIVAL AND BARTER
DAYS.**

Was held Sept. 28&29, 1974; to give people a chance to sell or barter their excess of food they have grown or gathered.

And watch these pages for more on bartering in upcoming issues.

The fossil fuel energy consumed by tractors in the United States is about equal to the total energy yield for US agriculture.

AUDIO VISUAL

N. W. Film Studies Center
Portland Art Museum
SW Park and Madison
Portland, Or. 97205 226-2811

Classes this fall:

1. "Film and the American Dream 1900-1960". Films and lectures on American culture in the 20th century. Oct. 3--Nov. 14.

2. "Film Painting". Concepts and Techniques of making hand drawn film. Oct. 14-Dec. 18.

3. "Introductory Filmmaking". Introduction to 16 mm film production and field experience. Oct. 8-Nov. 26th.

4. "Workshops in Television Production". As well as TV production, video as art form, aural and image feedback, colorization, image manipulation and studio practices. Oct. 7- Dec. 9.

IMAGES, a newsletter for the people of Coos-County, Oregon. Coos County TV. PO Box 641. Bandon, Or. 97411.

Coos County TV is five people working on developing community education and information materials on land use planning. Producers of "Coos County: The Future is Now"; "Hands On" (citizen planning); and "People and the Land". Funded by federal Title I money, administered by State of Oregon Educational Coordinating Council.

We have heard from Thomas M. Doggett, Director of Programming and Production, OEPBS, that KOAC Radio TV is in the process of developing a short series of programs with the OSU Federal Cooperative Extension Service regarding construction of homes for most efficient energy usage. These will probably not air before the first of the year. (M. L.)

CREATIVE OUTLET

201 SE 12th

Portland, Or. 97214 233-3654

Currently the Outlet's focus is the Neighborhoods in Transition project (see History), the development of an "electronics bench"--to include tools and information for editing video tapes, a monthly hands on video workshop (see calender), communication consultation for low income persons, non profit groups, and dark room, still photography work. (see also "GROW" under education).

see also Media, Energy

COMMUNITY

Small Town. Newsletter of Small Towns Institute
PO Box 517

Ellensburg, WN 98926

Information regarding making small town America a viable alternative to congested cities and the sprawl of suburbs.

Decentralized Communities, subject of The Limits of the City, M. Bookchin, Harper Colophon, 1974. \$2.75

Rural New Towns: Toward a National Policy. Shimon Gottschalk

Center for Community Economic Development
Cambridge, Massachusetts 02140
22pp. 1971

Proposes a policy for rural new towns for America as an alternative to migration for rural poor families.

**OFFICE OF NEIGHBORHOOD ASSOCIATIONS**

405 City Hall 248-4519
Portland, Or. 97204

Mary Pederson, director, has written a paper called "Neighborhood Organization in Portland", available on request. Also published in Portland Scribe. 215 SE 9th. Portland, Or. 97214. The Scribe weekly publishes a neighborhood news column which supplements the Office of Neighborhood Association's newsletter--which is an excellent source of information about hearings/conferences concerning neighborhoods of Portland.

Scientific American. Sept. 1974. Population, entire issue. Migration, history, food, transfer of technology. \$1.25. (B. P.)

Human Settlements Symposium (Sept. 11-13) offered alternative approaches to understanding human settlements, information on current alternative human settlements to our large cities, and the opportunity for Spokaneites to brainstorm on the future of their human settlement.

COMPUTERS

People's Computer Company
PO BOX 310

Menlo Park, CA 94025

Newspaper \$4.00 for 5 issues (school year). Games, research, art, computer films, computer poetry. Both by resident People's Computer people, and elsewhere.

COMPUTERS CONTINUED PAGE 8

ECO NET REPORTS

EEC

A lot has happened in the last several months. The Environmental Education Center has been presented with both new resources and opportunities. These events have suggested the necessity for a reorganization of both our people and our thinking about the "big picture" of environmental education in the tri-county area, the Pacific Northwest and the nation.

PEOPLE

Director of four funded projects for FY 74-75 is Don Stotler.

Environmental Education Center (Environmental Ed. Act) PSU fiscal agent, Laura Williamson, manager.

National Demonstration Center at PSU (Environmental ed. Act), PSU fiscal agent, Laura Williamson, manager.

Energy Center (Environmental E. Act) OMSI fiscal agent, Dean Ivy, manager.

Environmental Communications Network (2nd of 3 yrs.) Hill family foundation. OMSI fiscal agent. Dean Ivy manager.

ECO NET

Because we feel that all four of these projects constitute a common thrust toward an environmentally concerned, literate, active, and aware future society, we are calling this common thrust Eco-net.

PRIORITY OF CONCERN

Although each one of the above projects has specific objectives all projects share general goals and areas of priority concern and action.

These areas of common concern are:

Centers

EEC---remodelling and new rooms
Action toward Bi-Centennial
Three new employees (Randi Krogstad, Anita Helle, Steve Johnson)
Energy Center (OMSI)---now underway
Spokane Center---U.S Pavillion retained after EXPO?
Cleveland High School---Eco-Aesthetics Center?
Hillsboro Public Schools--- community center?

Information Exchange

Bend In The River and Syncon conferences
NW Video Network
SHARE--- computerized Eco-exchange
RAIN---new eco-net newsletter
Slide show with audio tape on centers

Data Gathering by Students

Noise and water quality proposal

information, access to computer services and assistance; access to technical and legal environmental information on a crisis basis. Lots of other topics were touched on. The group asks you to brainstorm on your own and with co-workers and friends on information needs, information sharing projects, techniques and the NW environment. For regional Eco-net brainstorm group minutes, for more information, contact Dean Ivy, OMSI, 4015 SW Canyon rd. Portland, Or. 97221. 224-9500.

ECO NET Video

One of the components of the ECO NET project is a video access facility where you can learn to use portable, 1/2 " television equipment. The video staff, Bob Phillips and Charles Auch, are located at OMSI and can be reached by phoning 224-9500.

The video equipment, three portable camera/recorders and an editing system, serves as a means for anyone to document environmental ideas and problems. Tapes in the ECO NET files can be seen at the EEC or OMSI. In addition, Bob and Charles are cataloging tapes produced elsewhere in the Northwest with the assistance of Jack Eyerly (of Experiments in Art and Technology) and Carole Smith.

The catalog process involves a printed format for information about individual tapes, along with the conditions for access and the names/addresses of producers. If you have tapes and would like to have them included in the catalog, write to ECO NET Video, % OMSI, 4015 SW Canyon Rd., Portland, Or. 97221. The catalog forms should be returned to OMSI, where they will be reproduced. The catalog will consist of the combined entries of all contributors and will be distributed to everyone who participates in it. Additional copies will be available through access points throughout the Northwest, or by writing ECO NET Video and including a check to cover whatever costs of reproduction we have.

Examples of video projects during the summer include equipment assistance to the Creative Outlet's project, "Neighborhoods in Transition", which is compiling images/history of Portland's Buckman neighborhood. The Buckman neighborhood is in the urban core of Portland and has many of the problems of crime, absentee landlords, industrial encroachment, and transient populations associated with that location. Tapes from this project can be seen at the Creative Outlet, 201 SE 12th, phone 233-3654; talk with the Director, Ed Lyle, for further details.

Tom Taylor, of PSU's Center for the Moving Image, has worked on his project, "Cannon Beach, a Community Conversation", spending most of his time with the people of Cannon Beach, sharing the ideas that individuals have of their town. Tom comes back to OMSI to edit and condense these statements. He then returns and plays the edited tape for each of the participants. The conversations Tom has with his neighbors are part of a feedback process; everyone has the right to delete or change their statements. After the edited tape is shown to individuals, Tom plays it for the community at large. These edited tapes then provide the impetus for further discussions. (See also Audio-Visual)

Energy Center

My main task so far has been creating an Energy Information File. This has turned out to be a much more involved undertaking than I think anybody had originally thought it would be. Especially since the information is nationwide and with Canada and some foreign resources included. Thus far, I have gleaned information from several lists and sources, i.e. directories, guides, etc., to compile a random list. From

Boise ECO NET Meeting

15 people from 15 Northwest region environmental education groups and projects met to suggest information sharing methods and ideas which would enhance individual projects. Initial focus areas included--media access

this list, I have done one bulk mailing which was in the form of a cover letter and a very short form asking for names of individuals, affiliations, and contact persons in said affiliations. The response to this mailing which was about 200 plus has been excellent. So far I have received 75 responses in 2 weeks. Out of this I will compile a list of names to which the Energy Questionnaire will be sent. This is a more detailed form and will give me the exact information I need for the Rolodex Card File. The Rolodex Card File will eventually be placed in the Energy Center in an information exhibit.

If you would like more information on the Energy Information File, or would like to receive the Alternative Energy Information Sheets and the Solar Energy Collection Abstract, Wind-Powered Electricity Generation Abstract, Methane Gas Generation Abstract, etc. please call Marcia Lynch, 224-9500 x 72. (Marcia Lynch)

Lee Johnson has begun to receive commercially-manufactured solar collector panels for display in the Oregon Museum of Science & Industry Energy Exhibit Wing designed by Architect Explorer Post sponsored by Skidmore, Owings & Merrill. So far, Olin Corp., Tranter and Faeco have accepted the invitation to participate in the exhibit, which will be seen by OMSI's 1 million annual visitors. PPG Industries, Reynolds Metals, Energex, AAI, Intertechnology, Sunworks, Solar Systems, Mirromit-Daylin Corp., and Beasley of Australia have not yet responded. A Spring 1975 conference of Oregon architects, developers and building systems engineers is contemplated as an opening for the Solar Energy Exhibit (L.J.)

Lee's testimony "Wind and Nuclear Fission Electricity: A Cost-Benefit Comparison" was well received by Mr. Jack Robertson, Region X Federal Energy Administration coordinator and the other panel members, as was his description of the OMSI Energy Center as classes, workshops, conferences and an information center with displays. Copies of the statement are available for \$1 from Marcia Lynch, OMSI Energy Center. (L.J.)

Graham Hubenthal and Lee Johnson visited Tom Bender and Laura deMond in Salem on their way back from returning the U of O microfilm machine. Nancy Carpenter and Sam Sadler are now beginning "mini'studies" using net energy to look at the things Oregonians are now doing or likely to do as we move toward recession, greater labor use, in a net energy declining society.

Laura is working on a LIVING LIGHTLY IN OREGON catalog, a cross between the Whole Earth Catalog and Chinook Centrex with the emphasis on what Oregonians can do and what the net energy concepts suggest about what they should do. Tom recommended that we subscribe to APPROPRIATE TECHNOLOGY, a newsletter published by E.F. Schumacher's Intermediate Technology Development Group, Parnell House, 25 Wilton Rd., London SW1v 1JS, UK. Airmail outside England is \$8.50. Tom also suggested that we read Ivan Illich's ENERGY AND EQUITY and TOOLS FOR CONVIVIALITY. (L.J.)

SHARE 1

Share is presently a fantasy, designed to be part of OMSI's unified data base project (UDB-1 by name).

Rusty Whitney, Barry Smith and others are experimenting with a computer program devised to enable people to get in touch with one another.

The program is similar in ways to others around the country such as Resource One's "Community Memory" and People to People Indexes such as Evergreen State College's (Washington), the Couzens Computerized Learning Exchange (Ann Arbor, Mi.) and Bend in the River (Eugene).

What does Share give members?

Information from other members---Other SHARE members will contact you according to the interests which you have specified in your registration.

Directories & Mailing Lists---Members can use a computer terminal to create telephone and address lists of SHARE members with specific keywords or zip codes. For instance, an editor of a club newsletter could maintain her mailing list by sending SHARE registrations to her membership urging them to include the club name among their keywords. There are many other uses.

Bulletin Board---Members may use a SHARE computer terminal to place a short notice on the SHARE Bulletin Board. Members may also list the Bulletin Board to get recent notices or only those with selected keywords.

SHARE Essays---From a few words to a couple pages, SHARE Essays deal with different topics of interest to members including ways to use SHARE better, thoughts on current environmental and educational projects, privacy, etc.

For more information call Steve Johnson, 229-4692.

"The life experiences determine what parts of the endowment are converted into functional attributes." (Rene Dubos. Man Adapting)

EDUCATION

A class in ALTERNATIVE ENERGY SOURCES for High School & Adults is being offered at OMSI this Fall. The instructor for this class will be Temple Larrabee.

For the Energy Center Mr. Larrabee is staff design and consulting engineer. This past summer, Mr. Larrabee has been working up the design of a one meter diameter 3 meters high vertical shaft savonius rotor windmill. He will also soon be working on the design of a horizontal axis propeller driven windmill. He is now in the process of drawing up a solar fruit dryer, polishing up and assembling a calorimeter for direct measurement of the solar radiation, and making final modifications on a photoelectric pyroheliometer, (also for the measurement of the sun's energy). Mr. Larrabee is also gathering information and catalogs of specialized parts needed for some of the special projects now in progress and projected. (M.L.)

The National Science Teachers Association is preparing an energy packet under contract with the U.S. Office of Education. The address of the NSTA is 1201 16th St. NW, Washington, D.C., 20036.

CARD NO. 1

Catalog of Teacher Incentive Projects 1972-73

A subprogram of the Oregon Small Schools Program. Oregon Board of Education 942 Lancaster Drive, NE Salem, Or. 97310

More teachers in the schools listened to the disc-jockey broadcast than was expected. (Medford Mid High School). . . Each group will be given two 24 hour weekend experiences of living in a house. (Portland Children's Center School). . . Raising the cognition level of student questions (Prospect high school). . . To determine which class got the Plague Award, a point system was developed (Grant Elementary School - Salem). . . Mr. Johnson invited a different craftsman to come every Friday for four weeks (W. L. Henry School - Hillsboro). . . Twenty hats representing a variety of occupations in the community were purchased (Jefferson Elementary - Cottage Grove). . . In this project a combined class of third and fourth graders write, edit, produce and mail a newspaper to third and fourth grade classes throughout the state. (Bush Elementary - Salem). . . the vehicle for this was a small portable trailer installed next to the school and used as a communications center for informal discussion groups. (St. Paul Parochial, St. Paul, Or.)

EXPLORING SEATTLE, course taught by John Hancock, Richard Fleming, Donald Tubbs, summer 1974, Institute for Environmental Studies, University of Washington.

BAROMETER

A BAROMETER MEASURES AIR PRESSURE. AN INCREASE IN AIR PRESSURE MEANS COOLER AIR IS COMING. A DECREASE IN AIR PRESSURE MEANS WARMER AIR IS COMING.

TO MAKE YOUR OWN BAROMETER:

1. STRETCH A PIECE OF BALLOON OVER THE NECK OF A BOTTLE. FASTEN IT SECURELY WITH A RUBBER BAND "PULLING OUT" ALL THE WRINKLES.
2. GLUE A LARGE NEEDLE INTO THE END OF A STRAW.
3. GLUE THE OPEN END OF THE STRAW TO THE MIDDLE OF THE BALLOON CAP.
4. ON A PIECE OF PAPER, MARK 11 STRAIGHT LINES, EACH $\frac{1}{8}$ " APART. NUMBER THE LINES 0 TO 10.
5. FIND A PLACE TO SET UP THE BAROMETER WHERE YOU CAN TACK OR TAPE THE PAPER TO THE WALL. PLACE THE PAPER SO THE NEEDLE POINTS TO THE NUMBER 5. (SOURCE: ALLAN BATES)

WHEN THE AIR IS HEAVIER, IT PRESSES DOWN ON THE BALLOON CAP & CAUSES THE NEEDLE TO ---
THIS MEANS THE TEMP. WILL GET ---
WHEN THE AIR IS LIGHTER, THE BALLOON CAP RISES & CAUSES THE NEEDLE TO ---
THIS MEANS THE TEMP. WILL GET ---

San Francisco, Ca. 94117

EDUCATION CONTINUED FROM PAGE 9

KNOWLEDGE FOR USE PROJECT. Phil Pennington, 244-9122.

A new, alternative way to learn. It's designed to help people find and learn things they need and might otherwise miss, things too difficult to learn from the library and too buried in courses in formal education. It is designed to help people help themselves learn.

The project organizes knowledge and learning about the simple fact that people interact with their surroundings. The idea is to fuse the academic disciplines into some kind of integrated whole and then relate it to the individual as much as possible. The project will be a source of a variety of materials, including reference guides and aids to understanding reading that is otherwise a little too difficult. It will develop some learning units suitable for reference use or for classroom use.

The Knowledge for Use Project is planning three workshop series, one to start immediately. Energy and the Individual (starts last week of Sept.; time arranged to suit participants); Science and Perception For The Artist (starts in Oct.); and Humans, Systems, And Knowledge (to be arranged).

ENERGY AND MAN'S ENVIRONMENT. PO Box 200, Beaverton, Or. 97005. (503) 649-0443.

EME is an educational project sponsored by a consortium of the N.W. electrical utilities in cooperation with the State Depts. of Education in the seven Western States. EME is in the process of developing a balanced and objective energy and energy related environmental inter-disciplinary curricula for grades K-12.

An activity guide K-12 is available to teachers at \$2.95 a copy.

Small is Beautiful E. F. Schumacher. Harper & Row. 1973

There should be no place for machines that concentrate power in a few hands and turn the masses into mere machine minders.

Not surprisingly, therefore, if if economic thinking pervades the whole of society, even simple non-economic values like beauty, health or cleanliness can survive only if they prove to be economic.

Give a man a fish, and you are helping him a little bit for a very short while, teach him the art of fishing and he can help himself all his life.

Just imagine you could establish an ideology which would make it obligatory for every able bodied person in India, to do that little thing -- to plant a tree a year, five years running. This in a 5 year period would give you 2,000 million established trees.

Ten cows burp enough gas in a year to provide for all the space heating, water heating and cooling requirements for a small house. (WTOP Radio, Washington, DC)

Dana C. Jennings, author, photographer is compiling a catalog for Garden Way Laboratories of supplies of hardware, plans, data, information and services for those working with alternative energy sources: sun, wind, etc. If you or your group wish to be listed in the catalog, send data to Rt. 3, Box 177, Madison, S. D. 57042, in care of Dana Jennings (M.L.)

THERE IS A LOT OF MAPPING going on in Oregon and Washington, by federal, state, county, city and regional governments, and by private agencies, but unfortunately there is a long way to go before complete adequacy is in sight.

The four most important federal mappers are the Coast and Geodetic Survey, the Geological Survey, the Forest Service, and the Bureau of Land Management. The first, with its coastal charts and its nets of mathematical triangulations, underlies all the others. The Geological Survey is responsible for two current series of maps, both incomplete, and some superseded series too, also incomplete; furthermore its maps are the underpinning of the famous Army Map Service mapping, the series which for the first time in history, was pushed through to completion for every acre of American soil.

The Army series (issued also in a civilian version, handled by the Geological Survey) while admirable in many ways, must be given low marks in certain fields, notably legibility. Why two versions, a military and a civilian? I've seen them both; the difference seems to consist in just one feature: the grid or land net. The military version displays the ten-kilometer military grid, an entirely fictitious grid resembling (but not identical with) latitude and longitude. The civilian version displays the net of townships, a real, not fictitious, grid, inasmuch as it is actually marked out by witness trees, stakes, and landmarks.

Many would like to own at least one of the famous moulded plastic relief maps which have been made by an Eastern firm on the basis of the military version of the Army series. They're now available through retailers, after a long period of limited distribution through a military map office only. Captain's, a map shop which just opened in downtown Portland, sells them at around \$10 each. The flat paper version hovers around \$1 or a little more.

These Army maps are almost too stingy in their scale to be of great use to the walker, bicyclist, or leisurely motorist. They are at the scale of 1:250,000, yielding a mile which is only 1/4 of an

State Highway Bldg.
Salem, Or. 97310

An excellent state highway map, free. For low prices you can get air-photo-base maps of nearly all congested areas; black & white maps of all cities, except Portland. County maps. Drawback: some counties dissected into numerous sheets. Exhaustive legend/information.

get maps

inch long. The one big advantage of this series is that it is complete--has no gaps--a point not to be sneezed at if you have had the common experience of finding that your favorite series has a hole just where you were depending on it to help you.

The Geological Survey also handles its own two series, called the "mile per inch" and the "2000-footer." The first has a scale of 1:62,500, which yields a mile so close to an inch in length that the difference is negligible. This series is printed in sheets about 17x21 inches in size, each covering a quadrangle 15 minutes of latitude and longitude on its sides. The oblong measures about 12x17 miles in area. Each oblong bears the name of some town, mountain, or lake within it. Local retailers ask about \$1 per sheet; if you're in no hurry you can send off to Geological Survey, Federal Center, Denver for their index or key maps and their price lists, generally about 75 cents per sheet. The series has extensive and disgraceful gaps. Nearly all Western Oregon is covered, and about a third of Eastern Oregon.

A more generous scale, 2000 feet per inch, characterizes the other Geological Survey series. Like the mile-per-inch, it shows land forms by means of brown lines called contours. On the whole, it is this series that the Geological Survey is pushing nowadays, while the other series marks time. The mappers are going great guns through the wide-open spaces of Eastern Oregon right now, and, after having just revised the Puget Sound and Willamette Valley coverage at this scale, are heading west through the Coast Range. This is the series to get, if you can afford it. Prices are the same as for the other series, around \$1 per sheet. But where a given area will be covered by only one or two sheets in the mile-per-inch series, it will require four to eight sheets for the same area in the 2000-footer series. The oblongs are about 6 x 9 miles, or 16 x 23 inches, in area, and the latitude-longitude quadrangle is 7 1/2 minutes on a side. Bulky and unwieldy.

ENGINEERING

PELTON WHEEL

A pelton wheel is a pressure turbine which runs off a gravity water system. There is a rotor with cups evenly spaced around the rim inside the pelton wheel. Each cup has a ridge in its center and a jet nozzle directs a high pressure stream of water on this ridge to give the wheel its speed and power. Pound for pound a pelton wheel is much more powerful than an electric motor. It takes about a 150 foot head, or fall, for best efficiency, but will operate on less.

FORUM ON THE HISTORY OF PORTLAND'S NEIGHBORHOODS AND ETHNIC COMMUNITIES.

Sponsored by the Center for Urban Education and the Oregon Historical Society. Held March 27, 1974, bringing together over 35 people working on different oral history projects (and related studies) in Portland. A list of the oral history projects available from Center For Urban Education. 0245 SW Bancroft. Portland, Or. 97201.

NEIGHBORHOODS IN TRANSITION

Creative Outlet. 201 SE 12th. Portland, Or. 97214. 233-3654.

Documentation through the use of video taped interviews some of the effects of urban renewal in the Burnside neighborhood and tracing those effects to the Buckman community.

The video tapes so far collected have been aired at several community "town hall" meetings in an attempt to encourage residents to discuss the future of their neighborhood.

Coordinator: Jack Cox.

LAND USE

SAUVIE ISLAND-WEST HILLS
COMPREHENSIVE PLANNING
PROJECT is now being done by the
Skidmore, Owings & Merrill Envi-
ronmental Study Group in conjunc-
tion with the Multnomah County
Division of Land Use Planning.
Last Wednesday, Sept. 11th, West
Hills residents sat eight to a table
in the Linnton H.S. auditorium
talking with their neighbors about
what they liked about where they
lived, what they wanted preserved,
what they saw as problems to fur-
ther development and what they
wanted changed. Base data gather-
ing and visual map display of flood
plains, landslide & slope instability,
agricultural capability, wildlife
habitat, existing land use, current
zoning and other factors thought by
the Study Group likely to affect
land use in the area were published
in a "Land Use Newspaper" distrib-
uted to area residents. This data is
now being revised to include informa-
tion sent in by people who have lived
in the West Hills for many years

Copies of the "Land Usepaper"
are available from the Multnomah
County Division of Land Use Plan-
ning at (503) 248-3043. The next
area land use workshop will be in
early November. Call the above
number for exact time & place.

Bi-monthly report on land use
legislation.

THE NATURE CONSERVANCY

The need for a preserved system
of natural areas, appreciated by
scientists such as Aldo Leopold and
Eugene Odum for years, must be
acknowledged more widely by citizens
and land-use planners. There will
be widespread use of such areas:
by scientists to monitor the environ-
ment and obtain baseline data; by
educators to teach an understanding
and respect for the land; by land
managers to revitalize unhealthy
land; and by us all for recreation
and enlightenment.

Three efforts are presently under-
way to preserve a system of natural
areas. The federal agencies are
setting aside a system of Research
Natural Areas representing the ba-
sic natural communities found on
federal land. The Oregon legislature
has established a state committee on
natural area preserves to develop
such a system for state lands. For
private lands, The Nature Conser-
vancy has been taking the lead through
land purchase and the Oregon Natur-
al Areas Inventory.

The Oregon Natural Areas Inven-
tory is an effort to obtain essential
data for the creation of a compre-
hensive natural area system in Ore-
gon. It will identify and evaluate
important ecological communities;
valuable habitats for plants and ani-
mals such as endangered species;
significant natural features such as
fossil beds or the biggest trees; and
areas particularly valuable for edu-
cation or research. The Inventory
will be a resource for land-use plan-
ners, agency employees, scientists
and conservationists. Without it
land preservation will be hit and miss,
and what we miss will be missed for-
ever. As Aldo Leopold said, "the
first rule of intelligent tinkering is
to save all the pieces."

The Nature Conservancy is a 24
year old non-profit, tax-exempt
corporation that obtains its funding
through public subscription. The
Conservancy's sole goal is the pre-
servation of natural areas. This is
accomplished in four main ways:
direct purchase; acceptance of gifts
of land; pre-purchase of ecologically
significant land for conservation-
minded government agencies who
later buy them back; and the conduc-
ting of natural areas inventories.

In Oregon, the Conservancy is
currently purchasing 175 acres along
the Sandy River Gorge, just 25 min-
utes from downtown Portland. Se-
curing this land will assure the per-
petual protection of the Sandy River
Gorge; the remainder of the area
is in the ownership of The Nature
Conservancy, the Bureau of Land
Management, Multnomah County and
the Campfire Girls, all of whom are
dedicated to maintaining the Gorge
in its natural and pristine condition.
The Gorge, and much of the Sandy
River itself, has remained surpris-
ingly untouched. It provides habitat
for osprey, eagles, deer, elk, bear,
mink and river otter. Salmon steel-
head and sea-run cutthroat use the
river, and the forest land on either
side is moist and rich with great
diversity of wildflowers and mush-
rooms. In order to purchase the key
175 acres, there is a fundraising
goal of \$23,000 by November 23 and
a three year goal of \$125,000 (Any
contributions can be sent to the
Conservancy's Northwest Office,
1234 NW 25, Portland, Or. 97210.)

A GUIDE TO PORTLAND

- 1) Essentially a library is a collection of recorded information. But so is a bookstore, an attic filled with old letters, or a pile of last week's newspapers on a trash heap.
- 2) The "winter count" kept by the Dakota Indians from 1800 to 1870 was simply a series of 71 pictures inscribed on a buffalo robe. Each picture portrayed the most important event of a winter and it was enough of a reminder to the tribal chronicler to allow him to describe a year's history of the tribe.
- 3) The Associated Credit Bureau has data on over 100 million people.
- 4) The city is chock-full of "junior" librarians, operating covertly under such titles as Federal Information Center, Contact Center, Easter Seals, . . .

We hope in this 1,2,4, or 7 part series to come in contact with different traditional and untraditional libraries, librarians, proprietors and information coordinators.

There are approximately 182 public, 43 college and university, and 60 "special" libraries in the state of Oregon; in addition there are about 1200 public schools all of which have some form of library or another.

Bonneville Power Administration, Library and Technical Information Services
1002 NE Holladay Street

Portland, Or. 97208 234-3361 x 4445

Electrical Engineering, law, 40,000 volumes. Public may use publications in library; inter-library loan service provided for individuals via public and academic libraries. Xeroxing at 5¢ per page. Johannes S. Schimmelbusch, head librarian.

Emanuel Hospital Medical Library

2801 N Gantenbein Av.

Portland, Or. 97227 280-4696

2,000 medical and nursing books with some sociology and psychology. Approximately 120 medical and nursing journal subscriptions. Use by hospital employees. Others in community may not take books out but may use on site. Inter-library loan and xeroxing available.

Evans Products Company, Corporate Library
PO Box 3295

Portland, Or. 97208 222-5592 x 358

Business library, emphasis on building materials. Large collection of annual reports, business periodicals. Permission must be gotten. Tammy Beals, librarian.

Good Samaritan Hospital and Medical Center
1015 NW 22nd Av.

Portland, Or. 97210 229-7336

Medical books and journals. Use by staff only.
Mrs. Melvina Stell, librarian.

Hyster Company, Technical Information Services
2902 NE Clackamas

Portland, Or. 97208 280-7402

5,591 volumes on engineering, engineering design, metals, management, personnel, industrial engineering, welding. Also Hyster authored material, Hyster historical records and annual reports. To this date no restrictions in onsite use. Special loans. Some microfiche and viewers use in library. James Bobzien, supervisor.

Multnomah County Library

801 SW 10th Ave.

Portland, Or. 97205 223-7201

500,000 volumes. Special collections of US Government, Oregon state, and Oregoniana collection. In art room subject index to loose leaf picture materials, records. Circulating films, art reproductions, slides. Large collection of most local newspapers, newsletters and magazines. Foundation center reference center, with last year's tax records on all Oregon foundations and many national. Phone service; recently implemented a phone reference center, for answering reference questions within reason.

University of Oregon Dental School Library

611 SW Campus Drive

Portland, Or. 97201 225-8822

16,000 volumes in dentistry. Available to dental students and dental school personnel and to practicing dentists and members of their staff throughout Oregon.

Oregon Dept. of Geology and Mineral Industries

1069 State Office Building

Portland, Or. 97201 229-5580

Geology of the United States, with emphasis on Oregon. US Geological survey publications, US Bureau of Mines publications, theses and dissertations on geology in Oregon. Publications may be used in office. Some may be checked out by professionals for limited time. Copying 10 cents a page.

Photos: Anita Helle

Oregon Historical Society

1230 SW Park Avenue

Portland, Or. 97205 222-1741

50,000 bound volumes, including periodicals, Oregon and Pacific NW history. Special collection of manuscripts (over 2 million loose sheets); accessible by "Guide to Oregon Historical Society Manuscript Holdings". Over 500,000 photographs. Microfilm collection of 750 newspapers (access: A Catalog of Microfilm collections). Open to all of college age and above, and to grade or high school students who present a note from teacher stating the subject of research and declaring they have exhausted the resources of the school and public libraries.

LIBRARIES

Pacific NW Forest and Range Experiment Station Library,
US Forest Service
809 NE 6th

Portland, Or. 97232 234-3361

23,000 volumes, forest disease, economics, engineering, products marketing, recreation, water shed management.

Pacific Power and Light Company Library
Public Service Bldg.

Portland, Or. 97204 226-7411 x 658

Engineering, electrical, geology, mining, environment. Loans by company employees and inter-library loan. Mr. W. L. Hutchinson, Librarian.

Portland State University
PO Box 1151

Portland, Or. 97207 229-4424

Major academic library in Portland. 460,000 volumes. Use by Portland State students/faculty; some guest

cards where need exists and Oregon State System of Higher Education and metropolitan area college students.

Providence Hospital Medical Library

700 NE 47th

Portland, Or. 97213 234-3211 x 314

Nursing. Use by employees, patients, and other hospital libraries. Mrs. Margaret Sidney, librarian.

United States Nat'l Bank of Oregon
Resource Library

PO Box 4412

Portland, Or. 97208

1,500 volumes. Banking and business. Speeches, theses, banking resources. Bank employees use. Correspondence with branches--books sent through mail. Chris Patterson.

MEDIA

CABLE TV. On Sept. 12, the Portland City Council voted 5 to 0 passing an ordinance which requests permission to seek proposals for a city cable communications system and to negotiate with Multnomah County for a Metropolitan Communications Authority to administer the system. Last spring the Citizens Cable Study Committee drew up their design of the system which features home subscriber entertainment; cable providing public information and public access to television as well as a closed system cable to link such institutions as hospitals, schools and government agencies. Bid requests will go out in October and will be analyzed three months later. In six months the city council will vote on whether or not to accept a particular bid proposal. Interested parties should contact Kennon McKee at 248-4128.

OREGON CITIZENS FOR RESPONSIVE MEDIA

A newly formed group concerned with the public service performance of local television and radio broadcasters in such areas as public affairs, public service announcements, editorials and news reporting. This fall, in anticipation of Federal Communications Commission review of station renewal applications, the group is performing a citizen evaluation of the public service performance of local television broadcasters, and will publicize the results. Interested persons should call in Portland, 228-0666.

Portland Youth Communications Inc.
4760 N Lombard. 283-2591
Portland, Or.

To publish a tabloid size newspaper in late September. Ann Shimmin, editor.

Beginning amateur radio course. Grade 7 and up. Preparation for Novice License Exam. Call OMSI for details. 224-9500

COMMUNITY FOCUS, an experimental project in community video telecommunication, funded by program IMPACT through Title I higher education monies, has been producing half inch video tape programs on the Corbett-Terwilliger Lair Hill area, and broadcasting these programs twice monthly over King Video cable. Upcoming is a series of twelve KPTV shows in cooperation with the Neighborhood Law Institute at Lewis and Clark School of Law, assisted in part by the Environmental Education Center. The KPTV programs on neighborhoods will be aired once a month on Sundays at 9:30pm. Watch your program listings or contact 228-3532.

Seattle, WN, 98104

The Couzens Machine, a Computerized Learning Exchange

Center for Research on Learning and Teaching
University of Michigan
Ann Arbor, Michigan
Report compiled by Ken Davis & Richard Libengood.

Developed for the residents of Couzens Hall, a dormitory of the University of Michigan. Organized as a collective within the framework of a course and supported by an instructional development grant, the Couzens Machine provided over 400 residents with information on (1) other residents who shared the recipients' interests, (2) upcoming events in the Ann Arbor area and (3) miscellaneous items such as cafeteria hours, typing, haircutting, laundry service.

Networks for Research and Education. Ed. by Greenberg et al.

MIT Press, May 1974, \$12.50
Covers computers and other inter-university information exchange techniques. (Synergy Access)

New World Communications

PO Box E
MIT Branch PO
Cambridge, MA. 02139
A centralized broadsheet distribution. You pay \$1.00 plus 4¢ per word or special price for flyer enclosure. \$\$ to be on subscription list.

OPEN, NW Information Network
1615 NE 63rd
Seattle, Wn. 98115
524-9312

A listing of 3500 groups and individuals interested in sources and uses of energy, alternative futures, media, agriculture and technology. Information packets available that include lists of individuals and groups working in areas of shelter, farming, video, alternative sources of energy, media. For requests send at least \$1.00 donation and self-stamped envelope.

Learning Exchanges, Ken Davis

50¢ from Futures Conditional Box 1531
Wickenburg, AZ 85358
A directory to 42 learning exchanges in the United States.

Media, Social Services

OUTDOOR ED

Hancock happening. 3 day outing at OMSI's Nature Science Camp in John Day area. Call 224-9500 for details.

PARTICIPATION

SOME INTERACTIVE MEDIA AND CITIZEN PARTICIPATION PROJECTS

1. ACCESS(Alternative Comprehensive Community Environmental Study System), Santa Barbara Region; national office: 1730 K St. NW Washington, DC 20006

Developing a computer-simulated model of Santa Barbara Region so citizens and decision-makers can feed in their theories and watch the results.

2. SYNCON, 2325 Porter St. NW Washington, DC 20008

Sponsors conferences around the country, broadcast live over educational TV with viewer call-in.

3. Goals for Georgia, 506 Fulton Federal Bldg. Atlanta, GA 30303
Launched in 1971 at the request of Gov. Jimmy Carter, eight goal areas were designated: Education, Government, Protection of Persons and Property, Transportation, Social Development, Economic Development, Natural Environment, Physical and Mental Health. Each became the subject of a discussion and call-in telecast and later a statewide conference.

4. Hawaii Commission on the Year 2000, Box 3110, Honolulu, HI 96802
Promotes citizen participation through task forces, field studies, advisory groups and other means, and has enhanced communications through college and secondary courses, educational television and other media. Substantive issues include population stabilization, alternative economic futures, educational futuristics.

5. Council on Population and Environment, 100 East Ohio St. Chicago, IL 60611

Aired television program on transportation in late 1973, received 2,000 telephone responses and 20,000 newspaper ballot returns.

6. Iowa 2000, 523 East 12th St. Des Moines, IA 50319

Held local and regional meetings to raise issues and elect delegates to Governor's Conference on the Future of Iowa. Televised an Iowa Quiz with 23 questions, narrated by Harry Reasoner, on all Iowa television stations Jan. 13, 1974. Four "umbrella" topics: Natural Resources, Energy, Economic Development, Life Enhancement.

7. Massachusetts Tomorrow, 145 Hanover St. Boston, MA 02108

Working in eight task force areas: Economics, Energy, Land Use, Water Resources, Housing, Education, Transportation, Health.

8. New Hampshire Tomorrow(defunct).

Before expiring, helped form 58 "Action Teams" in the areas of Economic Growth and Environmental Action, Pollution Abatement, Land Acquisition and Access, Scenery Preservation and Environmental Education. For a copy of "NHT: A Report", write: Society for the Protection of New Hampshire Forests, 5 S. State St. Concord, NH 03301

9. Feedback, Box 297, Troy, NY 12180

Sponsored three TV programs with viewer call-in and newspaper balloting in Capitol District of New York State.

10. Regional Plan Association, 235 E. 45th St., New York, NY 10017
Broadcast a series of television documentaries in the areas of Housing, Transportation, Environment, Poverty and Cities/Suburbs. Viewers responded through mail ballots.

11. Century 3 Project, The Institute, Box 174, Dickerson, MD 20735

Has selected 13 small communities around the country (centered at Media, Penn., and including Bend, Ore.) for a pilot project using communications and data processing techniques to set community goals and "generate a genuine consensus around a preferred future." Plans to set up a telecommunications network linking all 13 communities by 1976.

12. Earthrise, Box 120, Annex Sta., Providence, RI 02901

Acts as a clearinghouse for information on future-oriented groups. Setting up five interrelated activities:

The Rhode Is. Model, the Rhode Is. Game, the Rhode Is. Poll, the Rhode Is. State Indicators System, and Rhode Is. Design Systems.

13. Goals for Dallas, 825 One Main Place, Dallas, TX 78520

Initiated in 1966, the group selected 12 areas: The Government of the City, the Design of the City, Health, Welfare, Transportation and Communications, Public Safety, Elementary and Secondary Education, Higher Education, Continuing Education, Cultural Activities, Recreation and Entertainment, and the Economy of Dallas. Through neighborhood meetings, which involved 100,000 participants, identified 106 specific goals, with definite steps to be undertaken by specific deadlines. States "approximately 27% (of the goals) can be considered achieved."

14. Citizen's Alternatives for Washington, Seattle (800)552-7108 toll-free

Supported by the state of Washington, estimates that a quarter million people will become involved this year. Policy options will be developed and presented to the public for consideration using radio, television and print media, in conjunction with telephone and newspaper polls.

COASTWATCH OREGON

PO Box 488,

Portland, Or. 97207 222-1963

Project of the Oregon Shores Conservation Coalition. A volunteer network, organized to monitor areas of environmental concern on the coast; and an educational program to research, compile and distribute materials on scientific, economic and planning issues relevant to coastal zone management. Contact Susan Brody.

Futures Conditional

Box 1531

Wickenburg, AZ 85358

Robert Theobald has directly and indirectly inspired several interactive media, "national values" testing projects.

ALTERNATIVES FOR WASHINGTON, 312 First North. Seattle, Wn. 98109.

For a current report of this statewide goals for the futures of Washington program, ask for newsletter, "Alternatives".

CONTINUED ON PAGE 22

PARTICIPATION CONTINUED FROM PAGE 21

Bend in the River, Final Report on Conference

The BTR Reality, #4. 100 pages Available to delegates and in limited numbers. Reports from each group; the final ballot results of the 5000 voters. Lots of addresses (1600). A BTR fashion report. 100s of little tiny photo portraits, report on comments enclosed in the ballots (8 pages!) A feeling of opinions from all over the state, and from truckers, film makers, cooks, farmers, lawyers loggers, etc.

Reports indicate the delegates still meet, . . . town meetings are more popular in the state. . . what's happening in the country looked at what's happening in the city. . . Some people have better state maps in their heads and what's happened for the last 3-4 years is a little clearer, and so is where to go - and there's 1600 people looking at each other through a directory in the BTR Reality.

PO BOX 10521

Eugene, Or. 97401

For activities of Portland Delegates, call 229-4692

Feedback: An Involvement Primer

Harry Stevens

20 Lakewood Pl.

Troy, NY 12180

National Science Foundation report. A how to do it manual based on experience with the "Involvement with Education" project in New York, and other media and citizen feedback programs.

An Involvement Primer concludes by making projections for a global involvement network containing community nodes to facilitate feedback balloting on a regular basis as well as many other involvement techniques and processes.

A report on "People and the Land" Public Workshops, July, 1974 Oregon Dept. of Land Conservation and Development
1175 Court St. SE Salem, Or.
Statistical analysis of feedback from over 3,000 people who have participated in LCDC workshops as an attempt to define the goals and guidelines for land conservation and development in Oregon.
For remaining workshops see CALENDER

CITY VOLUNTEER SERVICES 229-6563

RECREATION

Yellowstone Park. 30 sewer systems. 10 electrical systems. 750 miles of roads. 3,000 campsites

RECYCLING

Materials, an Environmental Resource Guide for Spokane

Dave Snyder, Elinor Nuxoll, and Mark Musick. Symposium Information Center. Expo '74. P.O. Box 1974. Spokane, Wn. 99210

A guide to the flow of materials in Spokane: recycling, used clothing, paper, books, sources of information.

Dictionary of Discards: How to make useful things of scrap. Frank M. Rich. 1972. Avonell Books. 419 Park Avenue S. New York, NY 10016.

Paper Clips. Some detectives in Munich recently traced down a shipment of 100,000 clips, in order to find out where they go; they found 25% had been used for attaching papers
19,413 were used as chips by card players
15,842 were topped with tissue and used as typewriter cleaners
14,163 were nervously twisted into Dali-like shapes during telephone conversations
7,212 were used to keep nylons up
3,196 were used to clean smoking pipes
5,434 served as toothpicks
5,309 as manicure tools
2,431 as screw tighteners
7,000 missing

WHOLE SYSTEMS

Metabolics of Metropolitan area", graduate status course taught by Richard Duncun and Frank Terraglio. Autumn, Fridays 1-3:30 pm. Portland State University. The inflow, storage, processing, utilization and outflow of air, water, information, people, raw materials, finished products, etc. 229-4960.

CULTURAL PARADIGMS PROJECT

Advanced Concepts Center
The Dept. of the Environment
Ottawa KIA OH3, Canada
(613) 997-3399

"To obtain, organize and criticize the written work of those who assert that a fundamental cultural transformation is occurring and/or needs to occur in western industrialized nations."

The Delphi Method: Techniques and Applications

The first book devoted entirely to the Delphi method (anonymous, iterative questionnaires and computerized conferencing) has been completed by Professor H. Linstone (PSU) and M. Turoff (Newark College of Engineering) and will be published by Addison-Wesley Publishing Co. in early 1975 (paperback and hard cover). This forecasting and communication technique is enjoying growing popularity in the US, Europe, and Japan on the part of government, business, and educational planners.

S&H Foundation Lecture Series

The Systems Science Program at PSU has been awarded a grant from the S&H Foundation to undertake a series of lectures on "Managing Complexity" early next year. The talks will be open to the public. Among the speakers: Professor C. West Churchman, University of California - Berkeley, and Professor Heinz von Foerster, University of Illinois.

Planning oriented courses in Systems Science at Portland State University (for details call 229-4960)
